Acknowledgement

I would like to express my heartfelt gratitude to **Lovely Professional University** and the **Times Foundation** for providing me with the opportunity to participate in the Community Development Program.

I am especially thankful to my faculty mentors and program coordinators for their constant support, guidance, and encouragement throughout this journey. Their inputs played a crucial role in shaping this initiative into a meaningful and impactful experience.

I extend my sincere thanks to the 244 participants from my local community who showed genuine enthusiasm, curiosity, and trust throughout the TCTC Online Quiz. Their willingness to learn and grow made this project truly rewarding.

Lastly, I am grateful to my family and friends for their support and motivation during the planning and execution stages of this project.

This experience has not only helped me grow as a student but also as a responsible citizen who wishes to contribute positively to society.

Kamrul Munir

B. Tech(CSE)

Lovely Professional University

Student Declaration

I, **Kamrul Munir**, a student of B. Tech in **Computer Science and Engineering** at Lovely Professional University, hereby declare that this report titled:

“Register 250 Students For The TCTC Online Quiz” And Also Held 5 Environmental Awareness Session ,is an original work carried out by me during the summer term. All the content presented in this report is authentic and based on my personal efforts, research, and experience during the course of this community engagement project.

No part of this report has been copied or reproduced from any other source without proper acknowledgment. Any data collected or recorded during the project has been gathered ethically and with appropriate consent where required.

This report is submitted as a partial fulfillment of the Community Development Program and reflects my honest contribution to the objectives of the initiative.

Name: Kamrul Munir

Registration Number: 12513828

**TIMES
FOUNDATION**

CERTIFICATE OF COMPLETION

This is to certify that
Kamrul Munir

has successfully completed the
Community Development Project
organized by Times Foundation in collaboration with
Lovely Professional University.

During the project, the participant actively contributed to community-focused initiatives and demonstrated commitment, responsibility, leadership and a strong spirit of social service.

The participant's contribution reflects a sincere dedication to creating a positive impact and fostering sustainable community development.

We appreciate the participant's valuable contribution and wish him/her continued success in all future endeavors.

Lieutenant Sanjiv Kaura
CEO-Corporate Social Responsibility
Bennett, Coleman & Co. Ltd.

Introduction

The Community Development Program (CDP) aimed to address the pressing need for digital literacy and awareness among individuals from different age groups and social backgrounds. As part of this initiative, I, Kamrul Munir, a B. Tech (CSE) student at Lovely Professional University, collaborated with the Times Foundation (The Times of India) to conduct focused activities for community students and other participants.

During the Environmental Awareness Session, I conducted awareness sessions for approximately 250 school students, ranging from Class 3 to Class 12. Photographs were taken during the sessions to document the activities and participation. The primary objective was to help students understand the importance of environmental protection, sustainable practices, pollution control, and responsible use of natural resources. The sessions also encouraged students to develop environmentally responsible habits and prepare themselves to contribute positively to future environmental challenges.

The diversity of the learners highlighted the importance of creating environmental awareness among students of different age groups. Through interactive discussions, explanations, and practical examples, the students gained a better understanding of their role in protecting the environment.

Seeing the students actively participate, share their ideas, and develop greater awareness was one of the most fulfilling outcomes of the program. By reaching approximately 250 students, the initiative helped lay a strong foundation for greater environmental awareness and encouraged young learners to adopt responsible practices for a cleaner, healthier, and more sustainable future.

Problem Identification And The Cause

During the Community Development Project, the major problem identified was the **lack of environmental awareness among people, especially students and community members**. Many people are not fully aware of the harmful effects of pollution, improper waste disposal, excessive use of plastic, water wastage, and unnecessary consumption of electricity and other natural resources. A lack of proper knowledge about environmental conservation can lead to unhealthy surroundings and negatively affect the environment in the long term. To address this issue, **Environmental Awareness Sessions** were conducted to educate participants about pollution prevention, waste management, water and energy conservation, cleanliness, recycling, and sustainable living practices.

In addition, the **Times Foundation TCTC Online Quiz** was used as an interactive activity to improve participants' knowledge and understanding of environmental issues. The main causes identified were insufficient environmental education, lack of awareness about sustainable practices, careless waste disposal habits, and limited participation in environmental activities. Therefore, creating awareness and encouraging active participation were considered important steps toward developing responsible environmental habits within the community.

Objectives To Be Achieved

The main objective of this Community Development Project is to create awareness among students and community members about the importance of environmental protection and sustainable development. The project aims to educate participants about pollution, waste management, recycling, water conservation, energy conservation, plastic reduction, and maintaining clean and healthy surroundings. Another objective is to encourage people to adopt environmentally friendly habits in their daily lives and understand their responsibility toward protecting natural resources.

The Times Foundation TCTC Online Quiz is intended to provide an interactive platform for improving participants' knowledge of environmental issues and testing their understanding through engaging questions. The project also aims to develop a sense of social and environmental responsibility, encourage active participation in community-based environmental activities, and motivate individuals to contribute to creating a cleaner, greener, and more sustainable community.

Various Steps Taken To Achieve The Objectives

To accomplish the outlined objectives, I adopted a systematic, learner-friendly approach that revolved around interactive learning, digital exposure, and real-world applications. Here's a detailed breakdown of the steps followed across different phases:

Phase 1: Participant Selection and Grouping:

I began by identifying 250 individuals from my community, including children from Class 2 to 12th Standard Students, and some elder individuals with minimal digital exposure. The diversity in class groups ensured that the program had a broader social impact. I formed groups based on their Class and familiarity with technology to ensure smoother sessions. This grouping helped me tailor explanations and guide them through the module effectively.

Phase 2: Introduction and Orientation:

The second phase of the Community Development Project focused on introducing the participants to the purpose, importance, and activities of the project. During the orientation, the participants were informed about the importance of environmental awareness and the need to protect natural resources for present and future generations. The session introduced key environmental issues such as pollution, improper waste disposal, plastic pollution, water wastage, energy conservation, and climate change. Participants

were also guided about the **Times Foundation TCTC Online Quiz**, including its purpose and how it could help improve their knowledge of environmental protection and sustainable practices. The orientation encouraged participants to actively take part in the awareness sessions and quiz activities and motivated them to adopt simple eco-friendly practices in their daily lives. Overall, this phase helped participants understand the objectives of the project and prepared them for active involvement in the upcoming activities

Phase 3: Accessing Times of India Portal:

In Phase 3 of the Community Development Project, the participants were guided on how to access the Times of India portal and navigate to the relevant environmental awareness and quiz resources. The purpose of this phase was to familiarize participants with the online platform and help them understand how digital resources can be used for learning and spreading environmental awareness. Participants were guided through the process of opening the portal, locating the required section, and accessing the Times Foundation TCTC Online Quiz. They were also encouraged to read the available environmental information carefully before attempting the quiz. This activity helped participants improve their digital skills, gain knowledge about important environmental issues, and understand the role of online platforms in promoting awareness and community participation. Overall, this phase provided a simple and effective way for participants to access educational resources and actively participate in the environmental awareness initiative.

Phase 4: Learning Through Videos and Explanation:

In this phase, participants learned about environmental issues through informative videos and detailed explanations.

The videos focused on pollution, waste management, climate change, water conservation, and environmental protection.

Participants gained a better understanding of how human activities affect the environment.

The explanations helped clarify important concepts and encouraged participants to adopt eco-friendly habits.

Real-life examples were used to make the learning more interesting and practical.

Participants were encouraged to reduce plastic use, save water and electricity, and maintain cleanliness.

Overall, this phase improved environmental knowledge and encouraged responsible behaviour toward nature.

Phase 5: Assessment Completion:

In this phase, participants completed the assessment based on the environmental awareness topics covered during the sessions.

The Times Foundation TCTC Online Quiz was used to assess their understanding of environmental issues and sustainable practices.

Participants answered questions related to pollution, waste management, conservation, climate change, and environmental protection.

The assessment helped identify their level of knowledge and understanding of the topics discussed.

It also encouraged participants to revise and apply the information they had learned.

The quiz provided an interactive and engaging way to evaluate learning outcomes.

Overall, this phase helped measure the effectiveness of the environmental awareness activities.

Phase 6: Certificate Generation and Record-Keeping:

In this phase, participants generated their certificates after successfully completing the Times Foundation TCTC Online Quiz.

The certificates served as recognition of their participation and completion of the environmental awareness activity.

Participants were guided on how to download and safely keep their certificates for future reference.

The necessary details related to participation and assessment completion were also recorded systematically.

Proper record-keeping helped maintain evidence of the activities conducted during the project.

This phase also motivated participants to take part in similar awareness and learning activities in the future.

Overall, certificate generation and record-keeping helped complete the project activities in an organized manner.

Phase 7: Practical Awareness Reinforcement:

In this phase, the knowledge gained from the environmental awareness sessions was reinforced through practical activities and daily-life examples.

Participants were encouraged to apply eco-friendly practices such as reducing plastic use, saving water and electricity, and properly disposing of waste.

They were also motivated to follow the principles of Reduce, Reuse, and Recycle in their daily lives.

Discussions focused on how small individual actions can create a positive impact on the environment.

Participants were encouraged to maintain cleanliness and motivate others in their community to adopt sustainable habits.

This phase helped connect the theoretical knowledge from the sessions and quiz with real-life environmental practices.

Overall, it developed a stronger sense of environmental responsibility

and encouraged active community participation.

Phase 8: Peer-to-Peer Sharing and Encouragement :

In this phase, participants were encouraged to share the environmental knowledge they gained with their friends, classmates, family members, and community members.

They discussed important topics such as waste management, pollution control, water conservation, and reducing plastic use.

Peer-to-peer communication helped spread environmental awareness in a simple and effective way.

Participants motivated each other to adopt eco-friendly habits in their daily lives.

They also shared ideas and practical solutions for keeping their surroundings clean and healthy.

This activity increased confidence, teamwork, and active participation among the participants.

Overall, peer sharing helped extend the impact of the project and encouraged collective responsibility toward environmental protection.

Phase 9: Visual Aids and Reference Materials:

In this phase, participants were provided with visual aids and reference materials to strengthen their understanding of environmental issues.

Posters, images, videos, charts, and other educational resources were used to explain topics such as pollution, waste management, recycling, and conservation.

These visual materials made the learning process more interesting, simple, and easy to understand.

Participants were encouraged to refer to reliable educational materials for additional information about environmental protection.

The resources also helped participants remember important environmental practices and apply them in their daily lives.

Visual aids encouraged discussion and increased interest in environmental awareness activities.

Overall, this phase supported effective learning and motivated participants to take responsible actions for a cleaner and healthier environment.

Phase 10: Geo-Tagged Photos and Documentation:

Throughout the sessions, I clicked **geo-tagged photographs** showing active participation. These photos act as visual evidence of the engagement and can be included in the report. I ensured that consent was taken from all participants for clicking and using these photographs solely for documentation.

Phase 11: Final Report Compilation and Submission:

In this phase, all the activities and outcomes of the Community Development Project were compiled into a final report.

The report included details of the environmental awareness sessions, Times Foundation TCTC Online Quiz, learning activities, assessments, and practical awareness activities.

Relevant photographs, certificates, records, and other supporting materials were organized and included as evidence of participation.

The key observations, learning outcomes, and overall impact of the project were also documented.

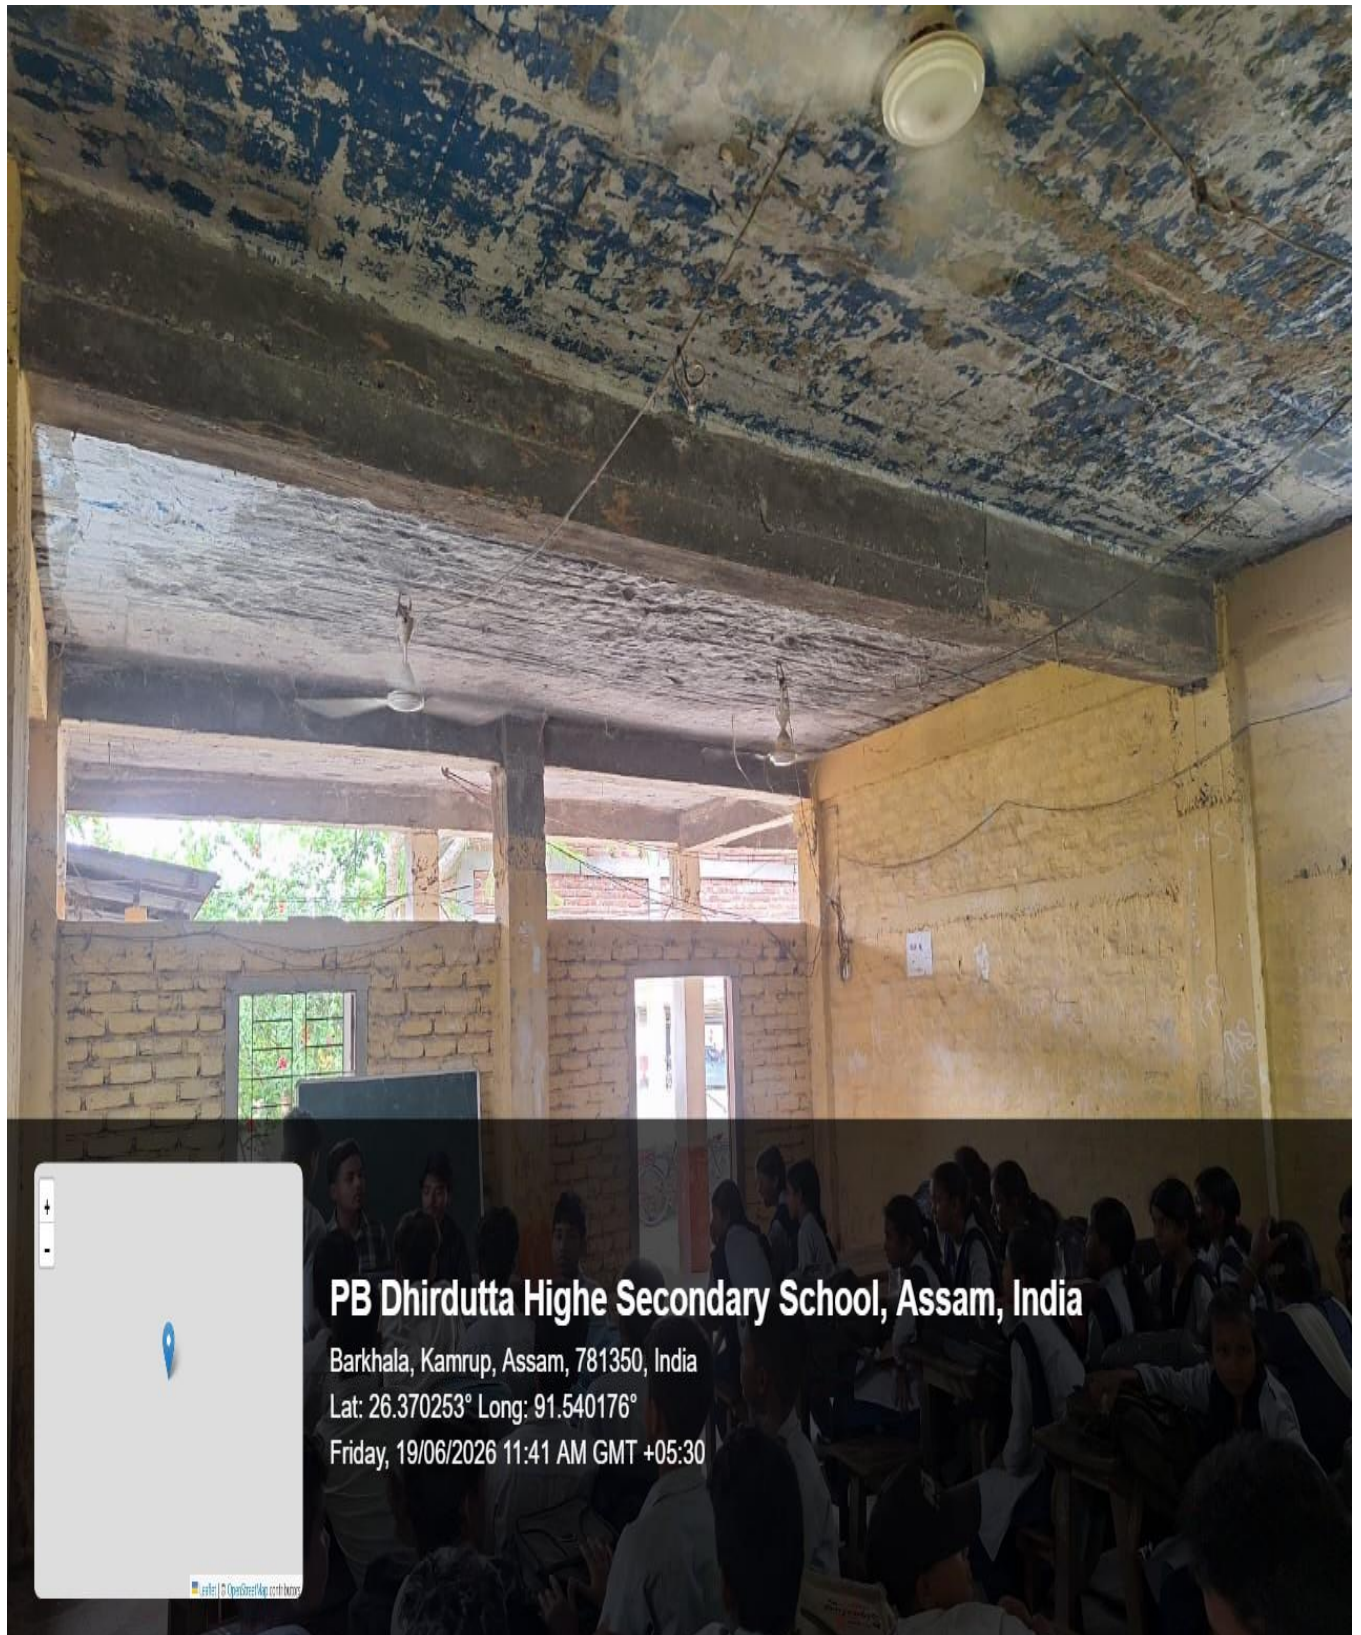

The report was reviewed carefully to ensure that all required information was complete and properly arranged.

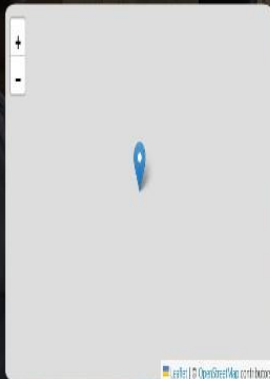

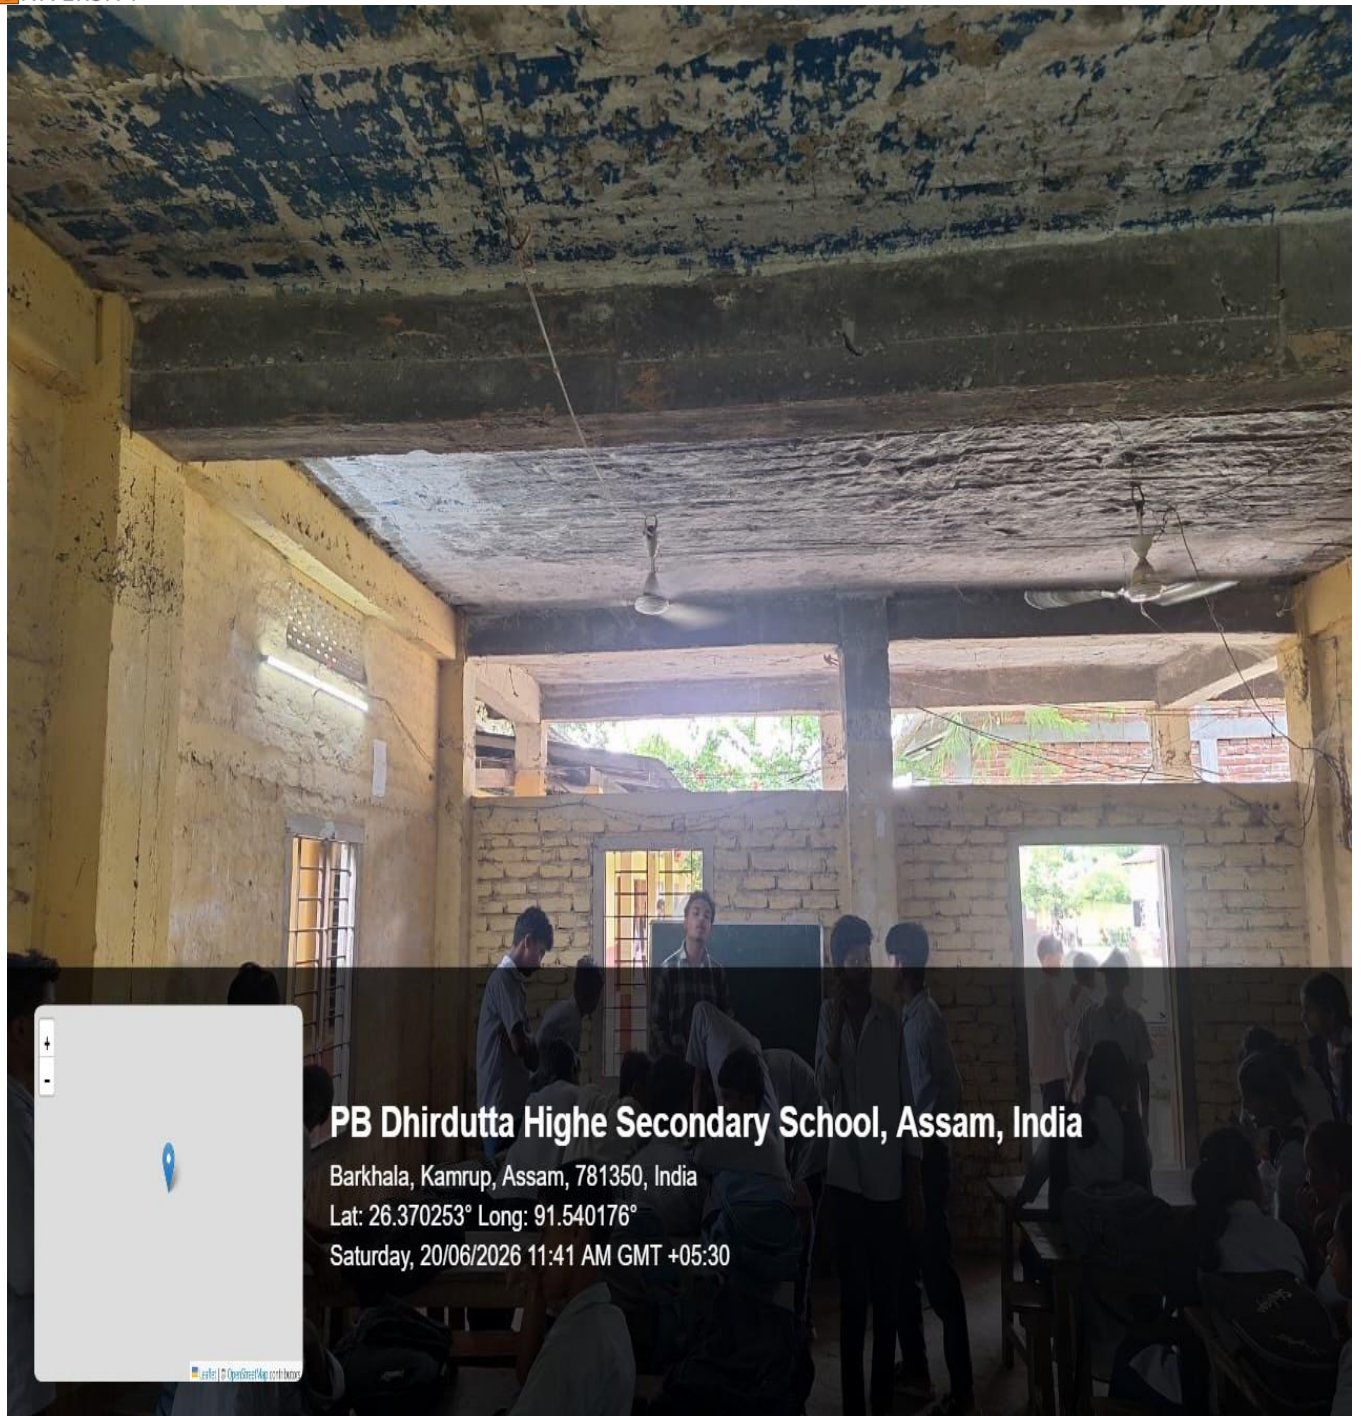

After final verification, the completed report was submitted according to the project requirements.

Overall, this phase helped summarize the entire project and present its achievements, learning outcomes, and community impact in a systematic manner.

Effectiveness Of The Project

The Community Development Project was effective in increasing awareness and understanding of environmental protection among the participants. The environmental awareness sessions, informative videos, explanations, and the Times Foundation TCTC Online Quiz provided an interactive and engaging learning experience. Participants gained knowledge about pollution, waste management, recycling, water conservation, energy conservation, climate change, and sustainable practices. The activities helped participants understand how human activities can affect the environment and why responsible behaviour is necessary for protecting natural resources.

The project also encouraged participants to adopt simple and practical eco-friendly habits in their daily lives, such as reducing plastic use, avoiding unnecessary wastage of water and electricity, maintaining cleanliness, and properly managing waste. Peer-to-peer sharing allowed participants to communicate what they learned with their friends, classmates, family members, and other community members, thereby extending the reach of the awareness campaign. The Times Foundation TCTC Online Quiz made the learning process more interesting and helped participants assess their knowledge of environmental issues.

The use of visual aids, reference materials, and educational videos made complex environmental topics easier to understand and remember. The assessment activities helped measure the effectiveness of the learning sessions and identify the level of understanding among participants. Certificate generation also encouraged participants and provided recognition for their active involvement in the project.

Overall, the project successfully promoted environmental awareness, responsible citizenship, teamwork, and community participation. It helped participants understand that small individual actions can create

a significant positive impact when practiced collectively. The project therefore contributed toward developing environmentally responsible individuals and encouraging a cleaner, greener, and more sustainable community.

Identified Societal Problems

During the Community Development Project, the following three major societal problems were identified:

1. Lack of Environmental Awareness:

Many people have limited knowledge about environmental protection and the harmful effects of pollution, plastic waste, and excessive use of natural resources. This lack of awareness can lead to irresponsible environmental practices.

2. Improper Waste Management:

Improper disposal of household and community waste is a major problem. Excessive use of plastic, lack of segregation, and limited recycling practices can cause pollution and create unhygienic surroundings.

3. Wastage of Natural Resources:

Unnecessary wastage of water and electricity and careless use of other natural resources were also identified as important concerns. Promoting conservation, responsible consumption, and sustainable habits is necessary to protect resources for future generations.

Conclusion

The Community Development Project on Environmental Awareness Sessions and the Times Foundation TCTC Online Quiz was a valuable learning experience that helped create awareness about important environmental and societal issues. Through awareness sessions, educational videos, online quizzes, visual materials, practical activities, and peer-to-peer sharing, participants gained a better understanding of pollution, waste management, recycling, water conservation, energy conservation, and sustainable living.

The project also encouraged participants to adopt simple and responsible environmental practices in their daily lives. The Times Foundation TCTC Online Quiz provided an interactive method to assess and strengthen their environmental knowledge. The activities demonstrated that awareness, education, and active participation can play an important role in solving environmental problems at the community level.

Overall, the project successfully developed a sense of environmental responsibility and encouraged participants to contribute toward a cleaner and greener society. It also showed that small individual efforts, when combined with collective community participation, can create a meaningful positive impact on the environment. This project has motivated us to continue spreading environmental awareness and promoting sustainable practices in the future.
